

Non-GMO Compliance Set-up Services Action Items

Conduct Initial Assessment:

Perform a thorough evaluation of existing products, ingredients, and supply chain practices to identify Non-GMO compliance needs.

Develop Compliance Roadmap:

Create a customized roadmap outlining necessary steps, timelines, and responsible parties for achieving Non-GMO certification.

Supplier Identification and Verification:

Research and compile a list of potential suppliers of Non-GMO ingredients.

Conduct audits of existing suppliers to verify their Non-GMO status.

Documentation Preparation:

Gather and prepare necessary documentation for Non-GMO certification applications.

Ensure all supporting materials are accurate and complete.

Label Review and Design:

Assess current product labels for compliance with Non-GMO labeling standards.

Develop compliant labeling designs that effectively communicate Non-GMO claims.

Training Development:

Create training materials focused on Non-GMO standards, compliance requirements, and best practices.

Schedule and conduct training sessions for relevant team members.

Implement Monitoring Protocols:

Establish a schedule for regular audits and compliance checks.

Create reporting systems to track ongoing compliance and address potential issues.

Consumer Communication Strategy:

Develop marketing materials that clearly communicate your Non-GMO commitment to consumers.

Plan outreach efforts to engage with your target audience about the benefits of Non-GMO products.

Ongoing Support Plan:

Set up a system for ongoing consultation and support to address compliance questions or challenges.

Schedule periodic reviews to assess compliance progress and adjust strategies as needed.
