

Non-GMO Compliance Support Services Action Items

Initial Consultation:

Schedule a kickoff meeting with key stakeholders to discuss Non-GMO compliance goals and objectives.

Collect preliminary data on current products, processes, and suppliers.

Conduct Gap Analysis:

Assess current products for Non-GMO compliance.

Identify gaps in sourcing, processing, and labeling.

Develop Compliance Plan:

Create a detailed roadmap for achieving Non-GMO certification.

Assign responsibilities and timelines for each step of the plan.

Supplier Assessment:

Compile a list of current suppliers and their Non-GMO status.

Conduct audits or assessments of suppliers to ensure Non-GMO practices.

Certification Process:

Gather necessary documentation for Non-GMO certification.

Prepare and submit applications to relevant certifying bodies.

Labeling Strategy:

Review current labeling against FDA and USDA requirements for Non-GMO claims.

Design compliant product labels that effectively communicate Non-GMO status.

Staff Training:

Develop training materials focused on Non-GMO standards and practices.

Schedule training sessions for relevant staff members.

Implementation of Compliance Monitoring:

Establish a schedule for regular audits and compliance checks.

Create a reporting system for tracking Non-GMO compliance over time.

Consumer Engagement Plan:

Develop marketing strategies to promote Non-GMO products.

Create educational content to inform consumers about the benefits of Non-GMO.

Review and Adjust:

Schedule periodic reviews of the compliance plan and progress.

Adjust strategies and processes based on feedback and changes in regulations.
