

Proposition 65 Management System Services Action Items

Schedule a Demo

- Arrange a demonstration of the P65MS software with InterlinkIQ to understand its features and capabilities.

Identify Key Stakeholders

- Designate team members who will be responsible for using and managing the software.

Compile Chemical Inventory

- Gather a complete list of all chemicals used in your products to input into the P65MS.

Set Up User Accounts

- Create user accounts for designated team members within the P65MS platform.

Customize Compliance Alerts

- Configure the software to send real-time notifications for any changes to Proposition 65 regulations.

Training Sessions

- Schedule training sessions for your team on how to effectively use the P65MS software.

Integrate Supplier Management

- Input supplier information into the software and establish communication protocols for compliance documentation.

Generate Initial Compliance Reports

- Use the reporting tools to create your first compliance report and identify any gaps.

Implement Document Management

- Upload existing compliance documentation into the P65MS for centralized storage.

Review and Update Regularly

- Establish a regular review schedule to ensure that the chemical inventory and compliance data are up to date.
